

TCP/IP converter, Ethernet RS232 / RS485

Part-No.: 013405.20

This hardware option is used to connect a remotely a stand-alone FACP or an essernet FACP network essernet via a (for example) company-wide Ethernet LAN to a MBS Management Building System e.g. WINMAG plus or FlexES Guard control center via TCP/IP. This allows the device to be used as a protocol converter between the SEI contained on the essernet and the WINMAGplus / FlexES Guard control center available in the Ethernet LAN.

Features:

 System requirements for operation and software configuration: Windows® 2000/XP Bidirectional or unidirectional data transfer depends on the SEI used, thus serial essernet interface EDP unidirectional Part No. 784855 or bidirectional Part No. 784856. Up to 10 TCP/IP converters can be connected per PC (Personal Computer) / Workstation more than 10 converters needs a project related approval from the Technical Solution Center in Neuss-Germany.
