

Adapter module ADP-PRS-232

Part-No.: 784754

The adapter module is an additional module suitable for electrically isolated connection of a paging system to a FAT 3000. The FAT 3000 programming interface (RS 232 terminal) is used for communication with the paging system. If an electrically isolated connection between the FAT and the paging system is required, an ADP-PRS-232 must be used additionally.

Operating voltage	8 ... 30 V DC
Quiescent current @ 12 V DC	approx. 5 mA
Dimensions	W: 100 mm H: 80 mm D: 20 mm

 The ADP PRS-422 module can also be used to connect a PC to the serial interface Part No. 784847. CD-ROM with programming software FAT ProgWin (Languages: German, English)
